| 10      | Risk factors                        |
| 11      | Outlook                             |

## 1. Executive summary

Solvane Dynamics closed Q3 of the current fiscal year with total revenue of **\$5.14M**, up from **\$4.36M** in Q2, representing **17.9% quarter-over-quarter growth**. Growth was driven primarily by Priority-tier and Enterprise-tier FleetOS expansions at existing 3PL customers. Operating margin improved to 9.7% from 3.1% in the prior quarter.

## 2. Revenue by segment

| Segment         | Q2 revenue | Q3 revenue | QoQ change |
|-----------------|------------|------------|------------|
| Standard tier   | \$0.98M    | \$0.91M    | -7.1%      |
| Priority tier   | \$1.76M    | \$2.05M    | +16.5%     |
| Enterprise tier | \$1.62M    | \$2.18M    | +34.6%     |
| Total           | \$4.36M    | \$5.14M    | +17.9%     |

## 3. Revenue by region

| Region               | Q2 revenue | Q3 revenue |
|----------------------|------------|------------|
| North America        | \$3.71M    | \$4.28M    |
| Europe (Krakow book) | \$0.65M    | \$0.86M    |

The Europe book grew faster in percentage terms (+32.3% QoQ) off a smaller base as early EU pilot customers converted to full-fleet contracts.

## 4. Cost of goods sold and gross margin

Cost of goods sold, consisting primarily of AWS infrastructure and MQTT broker hosting costs, was \$0.89M in Q3, up from \$0.79M in Q2. Gross margin was 82.7% in Q3, versus 81.9% in Q2.

## 5. Operating expenses by department

| Department            | Q2 OpEx | Q3 OpEx |
|-----------------------|---------|---------|
| Engineering & Product | \$1.62M | \$1.71M |
| Sales & Marketing     | \$1.24M | \$1.38M |
| Customer Success      | \$0.71M | \$0.84M |
| G&A                   | \$0.51M | \$0.53M |
| Total OpEx            | \$4.08M | \$4.46M |

The increase in Customer Success spend reflects four new deployment-support hires onboarding the Enterprise-tier expansions referenced above.

## **6. Headcount and hiring**

Total headcount grew from 164 at the end of Q2 to 176 at the end of Q3, an increase of 12 employees, primarily in Customer Success (4) and Hardware & Validation Engineering (3). Total personnel costs represented approximately 68% of total OpEx in Q3.

## **7. Cash position and runway**

Solvane ended Q3 with \$11.2M in cash and cash equivalents, down from \$11.9M at the end of Q2. At the current burn rate, management estimates approximately 16 months of runway remaining, excluding any future financing events.

## **8. Customer metrics**

Solvane served 11 active FleetOS customers across 34 warehouse sites at the end of Q3, up from 9 customers and 27 sites at the end of Q2. Net revenue retention (NRR) for Q3 was 121%, compared to 112% in Q2.

## **9. Sales pipeline**

The Q4 sales pipeline stood at \$7.4M in weighted opportunity value as of the end of Q3, concentrated in the Priority and Enterprise tiers. Sales leadership noted growing interest from prospective customers requiring multi-vendor fleet support following the Q2 SFI protocol launch.

## **10. Risk factors**

Revenue concentration risk: the three largest customers represented 41% of Q3 revenue. Supply-chain risk: two of Solvane's hardware-vendor partners have reported extended lead times for charging-dock components, which could delay new-site go-lives in Q4.

## **11. Outlook**

Formal Q4 revenue guidance has not yet been finalized and will be published following the Q4 planning offsite, in coordination with the product roadmap review described in the Product Specification document. An internal working assumption discussed at the Q3 board meeting was continued double-digit QoQ growth, but this figure is preliminary and was explicitly not approved for external or company-wide communication as of this report's publication.
